Impact Investment and RAS/AIS

Impact investments are investments made into companies, organizations, and funds with the intention to generate social and environmental impact alongside a financial return. A recent survey conducted by Global Impact Investing Network indicates that the impact investing industry is growing, with USD 228.1 billion assets under management (AUM) by 2017. Within the whole package, most of AUM were invested in developing countries, 18% in Asia (South, SE and East), 17% in Africa and the Middle East, 16% in Latin America and the Caribbean, and 10% in East Europe and Central Asia. More than half (56%) of the impact investors reported investment in food and agriculture, although its share overall AUM is rather small (6%). As RAS is not limited in the sector of food and agriculture, the potentials and opportunities from the emerging impact investment are immense and growing.

Blended Finance and Effective Partnership towards SDGs

Blended finance is the strategic use of development finance for the mobilization of additional finance towards sustainable development. Blended finance unlocked additional USD 81 billion in private finance for development during 2012-2015. To leverage investment, knowledge and capacities, between 2000 and 2016, a total of 167 facilities that engaged in blending were launched, with a combined size as measured by commitments of approximately $31 billion, accounting for 64% of mobilized capital and 74% of the transactions. Agriculture and rural sector accounts for a significant share of blended finance deals but the value is rather small, less than 15%. At the global and regional level, 53 newly launched facilities have a sectoral focus on food and agriculture.

Examples of Innovative Finance Facilities Related to RAS/AIS

Integrated Facilities: Agrica Guarantee Fund (AGF), launched in 2013 by ADB, AECID and DANIDA, with a size of $ 66.5 million; Beira Agricultural Growth Corridor (BAGC) Catalytic Fund (AgDevCO), launched in 2010 by DFID, the Embassy of the Kingdom of the Netherlands and Royal Norwegian Embassy, with a size of $23 million; Fund of AgriculturalFinance in Nigeria (FAFIN), launched in 2014 by AfDB, KfW through the
